Pastiera Nightly Signing Certificate Attestation

This document records the public certificate material for the shared Pastiera Nightly signing key. It is intended to be used as a verification reference for Pastiera Nightly APK signatures.

Certificate Identity

Subject	CN=Pastiera Nightly, OU=Development, O=PalSoftware, L=Italy, ST=Italy, C=IT
Issuer	CN=Pastiera Nightly, OU=Development, O=PalSoftware, L=Italy, ST=Italy, C=IT
Alias	pastiera-nightly
Validity start	Fri Mar 06 21:34:38 CET 2026
Validity end	Tue Jul 22 22:34:38 CEST 2053
Serial number	909d74f8d538dbdf
Signature algorithm	SHA256withRSA
Public key	RSA 2048-bit

Verification Note

Any Pastiera Nightly APK signed with the shared nightly key should present the certificate fingerprint listed above.

Linux Verification

Use standard Android SDK command-line tools:

```
APK=/path/to/app-nightly-release.apk
EXPECTED="8c5dce860a65a7a3c3befcb7f7f35a1f3523c1d01462271d6ae03f4df402e685"
ACTUAL="$(
  apksigner verify --print-certs "$APK" |
  awk -F': ' '/certificate SHA-256 digest/ { print tolower($2); exit }'
)"

printf 'Expected certificate SHA-256: %s\n' "$EXPECTED"
printf 'Actual certificate SHA-256:   %s\n' "$ACTUAL"

if [ "$ACTUAL" = "$EXPECTED" ]; then
  echo 'OK: APK is signed with the shared Pastiera Nightly certificate.'
else
  echo 'NOT OK: APK does not match the shared Pastiera Nightly certificate.'
  exit 1
fi
```

If `OK` is printed, the APK matches the shared Pastiera Nightly signing certificate recorded in this document.
