Pastiera Release Signing Certificate Attestation

This document records the public certificate material for the official Pastiera release signing key. It is intended to be used as a verification reference for official Pastiera release APK signatures.

Certificate Identity

Subject	CN=Pastiera, OU=Development, O=PalSoftware, L=Italy, ST=Italy, C=IT
Issuer	CN=Pastiera, OU=Development, O=PalSoftware, L=Italy, ST=Italy, C=IT
Validity start	2025-11-14 17:52:25 UTC
Validity end	2053-04-01 17:52:25 UTC
Signature algorithm	SHA256withRSA
Public key	RSA 2048-bit

Certificate Fingerprints

Verification Note

Any official Pastiera release APK signed with the official release key should present the certificate fingerprint listed above.

Linux Verification

Use standard Android SDK command-line tools:

```
APK=/path/to/Pastiera084.apk
EXPECTED="$(cat <<'EOF'
d5c018b9c33e0cda7cef0b006ed739d4
c6304c4ef4a0c4d9454a5302e7c4c3e7
EOF
)"
EXPECTED="$(printf '%s' "$EXPECTED" | tr -d '\n' | tr '[:upper:]' '[:lower:]')"

ACTUAL="$(
  apksigner verify --print-certs "$APK" |
  awk -F': ' '/certificate SHA-256 digest/ { print tolower($2); exit }'
)"

printf 'Expected certificate SHA-256: %s\n' "$EXPECTED"
printf 'Actual certificate SHA-256:   %s\n' "$ACTUAL"

if [ "$ACTUAL" = "$EXPECTED" ]; then
  echo 'OK: APK is signed with the official Pastiera release certificate.'
else
  echo 'NOT OK: APK does not match the official Pastiera release certificate.'
  exit 1
fi
```

If `OK` is printed, the APK matches the official Pastiera release signing certificate recorded in this document.
